

I am a female that travels a majority of my time around Texas. I pay for satellite radio because I need Instant Traffic and Weather reports in several different cities. I am not familiar with each cities radio stations, therefore I need a way to be updated and satellite radio fullfills this need. I can access traffic reports before I enter a city in order to determine if I need to go an alternate route. Please do not take this away from me, as a female it is my security blanket. Thank you for your time,
Stacy Jewett
